## PROFESSIONAL SUMMARY

Business Administration professional (Ingeniero Comercial) with approximately five years of direct experience in Supply Chain, operational logistics, materials and inventory in large-scale mining, mainly at BHP | Minera Escondida. Experience in end-to-end logistics, maintenance and shutdown materials planning, transportation and distribution, contractor and supplier management, SAP MM/MM, KPIs, budget tracking, management reporting and continuous improvement. Track record coordinating approximately 50 tractor-trailers, 500+ monthly deliveries, around 100 contractor workers and operations exposed to more than 100,000 SKUs.

## CORE COMPETENCIES

Supply Chain Operations | End-to-End Logistics | Materials Management | Inventory Management | Materials Planning | Warehouse Operations | Transportation & Distribution | Contractor & Supplier Management | SAP MM/MM | PR/PO | MIGO | Physical & Cycle Inventory | OTIF | Service Level | Inventory Accuracy | Budget & Management Reporting | BOS | Lean | RCA | Advanced Excel | Power Query | Power Pivot | VBA | Basic-Practical Power BI

## PROFESSIONAL EXPERIENCE

### BHP | Minera Escondida

#### Supervisor Home Delivery | Operational Logistics

Antofagasta, Chile | Mar 2022 - Oct 2025

- Indirectly supervised around 100 contractor workers and coordinated up to four external companies while managing an operation of approximately 50 tractor-trailers and 500+ monthly deliveries.
- Managed end-to-end logistics for mine, plant, workshops, warehouses, camp and projects: receiving, storage, dispatch, transportation, field delivery, reverse logistics, stock transfers, shipment tracking and documentation closure.
- Worked with an inventory universe of 100,000+ SKUs and approximately 10,000-20,000 recurring materials; managed criticality, stockouts, backorders, safety stock, excess and obsolescence.
- Planned material requirements from Work Orders, maintenance plans, criticality and lead time; supported major maintenance, outages and shutdowns with planning horizons of approximately 6-8 weeks.
- Used SAP MM/MM at an advanced operational level for Material Master, PR/PO, MIGO, Goods Receipt/Issue, reservations, Stock Transfers, physical/cycle inventory, Warehouse Management, STO and Maintenance Work Orders.
- Monitored OTIF, WOPIFOT, Service Level, Delivery Compliance, OTD, Lead Time, Inventory Accuracy and fleet availability/utilization; tracked budget execution and variances.
- Worked as an internally authorized Contract Operator and supported operational/contractual control of individual services above USD 1M, including one approximately USD 2.4M contract, monitoring SLA, performance, staffing, fleet and service validation.
- Reduced delivery non-conformities by approximately 30% through controls, follow-up and standardization; implemented two procedures for Proof of Delivery/delivery points and an automated daily planning report.
- Applied field leadership, risk assessments, inspections and critical controls; no injury accidents were recorded in the operations under my management/supervision during my tenure.

### BHP | Minera Escondida

#### BHP Graduate Program - Warehousing & Ports Management

Antofagasta, Chile | Mar 2021 - Feb 2022

- Rotated through receiving, warehousing, inventory, consolidation and logistics; performed physical-to-SAP reconciliation, variance analysis, adjustments, root-cause investigation and location control.
- Simplified operating procedures into One Page guides; the team/process improvement was associated with approximately 12% higher process efficiency.
- Automated planning/performance reports using SAP, Excel, Power Query, Power Pivot, VBA, macros and SAP Scripts, reducing manual consolidation by approximately 22.5 hours per month.
- Led the first phase of BHP Operating System implementation at Coloso Warehouse and temporarily assumed supervisory duties from November 2021 before moving permanently into logistics.

## S y R Ingeniería

### Site Supervisor

Chile | May 2018 - May 2019

- Directly supervised approximately 15 workers and coordinated around four suppliers/subcontractors across simultaneous projects; planned activities and controlled schedule, quality, materials, stock and inventory.
- Managed projects averaging approximately CLP 140M per project using Microsoft Excel and Project; implemented materials-control procedures and applied root-cause analysis to technical problems.
- Completed 365 days without injury accidents through field supervision, safety talks, risk assessments, inspections and preventive risk controls.

## Transportes NISSI

### Professional Internship - Logistics & Administration

Antofagasta, Chile | Jan 2018 - May 2018

- Supported receiving, control, dispatch and distribution activities; assisted customers and digitized documents and databases using Microsoft Excel.

## S y R Ingeniería

### Initial Internship - Administration & Management Support

Providencia, Chile | Jan 2017 - Mar 2017

- Supported contract administration, payroll-related documentation, databases, internal customers, project preparation and recruitment/selection processes.
