PROFESSIONAL SUMMARY

Supply Chain and logistics professional with approximately 5 years of experience in large-scale mining, primarily at BHP / Minera Escondida. Background in end-to-end logistics, materials and inventory management, maintenance materials planning, contractor coordination, transport operations, KPI management, operational reporting and continuous improvement. Advanced operational experience in SAP MM/WM and strong Excel capability including Power Query, Power Pivot, VBA, macros and reporting automation. Managed operations involving approximately 50 tractor-trailers, more than 500 monthly deliveries, indirect coordination of about 100 contractor personnel and a materials universe exceeding 100,000 SKUs. Experienced in critical materials, stockouts, backorders, maintenance work orders, shutdown/outage planning, contract performance, HSE controls and BHP Operating System (BOS), Lean and 5S.

PROFESSIONAL EXPERIENCE

BHP | Minera Escondida — Supervisor Home Delivery / Operational Logistics Specialist **Mar 2022 – Oct 2025**

Antofagasta Region, Chile

- Led end-to-end logistics across receipt, storage, dispatch, transport, field delivery, reverse logistics, inter-warehouse transfers, load tracking and document closure.
- Indirectly coordinated approximately 100 contractor personnel and up to 4 external companies, working with contract administrators and supervisors across operational requirements.
- Managed an operation of approximately 50 tractor-trailers and more than 500 monthly deliveries to mine, plant, workshops, warehouses, camp and project locations.
- Worked across a materials universe of more than 100,000 SKUs, with approximately 10,000–20,000 recurrently moving items, including critical, strategic, consumable, repairable and rotatable materials.
- Planned material requirements using maintenance work orders, maintenance plans, material criticality and lead time; supported major maintenance, outage and shutdown planning with 6–8 week horizons.
- Analysed stockouts, backorders, excess/obsolete inventory, safety stock and material availability to support operational continuity.
- Used SAP ERP / S/4HANA MM/WM for material master, PR/PO, goods receipt/issue, reservations, stock transfers, warehouse management, physical inventory and reconciliation.
- Monitored OTIF, WOPIFOT, Service Level, Delivery Compliance, Lead Time, Inventory Accuracy and fleet utilisation/availability.
- Monitored management budget, variances and initiatives linked to a corporate USD 5 million savings target established by senior management.
- Performed Contract Operator responsibilities and monitored SLA, service performance, workforce and fleet for contracts individually exceeding USD 1 million.
- Reduced delivery-related non-conformities by approximately 30% through procedure review, field verification, deviation follow-up and recurring internal customer reviews.
- Created two operating procedures for Proof of Delivery and standardised delivery points, plus an automated daily delivery planning/reporting tool.
- Maintained a record with no injury accidents associated with the operations under my management/supervision throughout my tenure at Minera Escondida.

BHP | Minera Escondida — Graduate Program — Warehousing & Ports Management **Mar 2021 – Feb 2022**

Antofagasta Region, Chile

- Rotated through receiving, storage, inventory, consolidation and logistics, developing end-to-end understanding of mining materials flows.
- Supported physical/SAP inventory reconciliation, variance analysis, root-cause investigation and location control across more than 100,000 SKUs.
- Helped simplify extensive operating procedures into one-page guides; the improvement contributed to an approximate 12% increase in process efficiency.
- Automated planning and performance reporting using SAP, Excel, Power Query, Power Pivot, VBA, SAP Scripts and Power BI, reducing manual consolidation by approximately 22.5 hours/month.
- Led the first phase of BHP Operating System (BOS) implementation at Coloso Warehouse, including standard work, visual management, Voice of Customer, critical controls, 5S, Kaizen and problem solving.
- Assumed temporary supervisory duties from November 2021 to maintain operational continuity; transitioned into a permanent logistics supervisory role after completing the program.

S y R Ingeniería — Site Supervisor

May 2018 – May 2019

Chile

- Directly supervised approximately 15 workers across multiple concurrent small construction projects and coordinated approximately 4 suppliers/subcontractors.
- Planned daily/weekly activities and controlled progress, schedule, quality, materials receipt, stock and inventory using Excel and Microsoft Project, with basic AutoCAD support.
- Improved materials control procedures to reduce losses, rework and unproductive time; completed 365 days without injury accidents.

Transportes NISSI — Professional Internship — Logistics & Administration

Jan 2018 – May 2018

Antofagasta, Chile

- Supported receipt and dispatch activities, customer documentation, employee records, remuneration databases and customer information management using Excel.

EDUCATION

Universidad Católica del Norte — Commercial Engineering — Degree in Business

Graduated 2018

Administration Sciences

Chile

- Commercial Engineering degree awarded with Distinction.
- Marketing seminar on the impact of Chilean food warning labels on university students' food choices — highest grade 7.0.

Pontificia Universidad Católica de Chile — Diploma in Leadership and Organizational

Nov 2025 – Sep 2026

Behavior

Chile

- In progress. Coursework includes effective communication, emotional intelligence, organizational management tools and leadership practice.

SELECTED CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- CSCMP Supply Chain Foundations: The Essentials Professional Certificate — CSCMP | Completed 2026.
- Google AI Professional Certificate — Google / Coursera | Completed Jun 2026.
- SAP Business Analyst Professional Certificate — SAP / Coursera | In progress.
- Business Intelligence with MS Excel and Power BI Desktop — Es Vanguardia E.I.R.L. | 15 hours | Jan 2018.
- Intermediate-Advanced Excel — Es Vanguardia E.I.R.L. | 15 hours | Dec 2017.
- EF SET English Certificate — 47/100, B1 Intermediate | Feb 2020.

TECHNICAL SKILLS

- **SAP ERP / S/4HANA: approximately 4.5 years of practical experience; advanced operational MM/WM across master data, PR/PO, goods movements, reservations, inventory, warehouse management, physical inventory and stock transfers.**
- **Key SAP transactions: MM01/02/03, ME21N/22N/23N, ME51N/52N/53N, MIGO, MB51/52, MMBE, MI01/02/04/07, LX03, LT01/LT22, VL01N/02N/03N/06O, IW33/IW39 and Z transactions.**
- Microsoft Excel: Advanced — Power Query, Power Pivot, VBA, macros, pivot tables, XLOOKUP, INDEX/MATCH, dashboards, advanced formulas, external connections and reporting automation.
- Power BI: Basic — data preparation, visualisations, dashboard updates/modification and operational analysis.
- Other tools: Microsoft Project, Visio, SharePoint, Teams and basic/support use of AutoCAD.
- **Operational Excellence: BOS, Lean, 5S, Kaizen, standard work, visual management, Voice of Customer, RCA, 5 Why, Ishikawa, PDCA and DMAIC.**
- **HSE: safety talks, risk assessments, inspections, preventive observations, critical controls, risk management and field leadership.**

RECOGNITION

- BHP | Coloso Warehouse — Recognition for implementation and application of BHP Operating System (BOS) and 5S methodology | Jun 2022.

LANGUAGES & MOBILITY

- Spanish: Native.
- English: B1 Intermediate — EF SET 47/100 (Reading B2; Listening B1). Functional technical reading; developing spoken fluency.
- Open to international relocation and travel; valid passport and Chilean Class B driver's licence.
- Target markets: Australia, New Zealand and selected U.S. opportunities with international hiring or sponsorship.
