PROFESSIONAL SUMMARY

Supply Chain & Operations professional with approximately five years' experience in large-scale mining, primarily with BHP | Minera Escondida. Background spanning operational leadership, end-to-end logistics, materials and inventory management, maintenance and shutdown planning, SAP MM/MM, contractor management, KPI reporting, budget monitoring and continuous improvement. Track record coordinating a ~50-truck operation, 500+ monthly deliveries, an indirect contractor workforce of ~100 people and inventory exposure exceeding 100,000 SKUs.

CORE CAPABILITIES

Supply Chain & Logistics: End-to-End Logistics | Transport & Distribution | Warehouse Operations | Reverse Logistics | Materials Planning | Contractor & Supplier Performance

Materials & Inventory: Materials Management | Inventory Control | Physical & Cycle Inventory | Maintenance Materials | Critical Materials & Spares | Stockouts | Backorders | Safety Stock | Excess & Obsolete Inventory

Systems & Performance: SAP MM/MM | Material Master Data | Stock Movements | Advanced Excel | Power Query | Power Pivot | VBA | OTIF | Service Level | Inventory Accuracy | Budget Monitoring

Leadership & Collaboration: Team Leadership | Teamwork | Communication | Stakeholder Engagement | Cross-functional Collaboration | Problem Solving | Planning & Prioritisation | Safety Leadership | Process Standardisation & Continuous Improvement

Current professional development (2025-2026): Diploma in Leadership and Organisational Behaviour in progress; CSCMP Supply Chain Foundations completed in 2026, with ongoing professional studies in supply chain, SAP and Excel.

PROFESSIONAL EXPERIENCE

BHP | Minera Escondida

Operational Logistics Supervisor

Official BHP title: Supervisor Home Delivery

Antofagasta, Chile | Mar 2022 - Oct 2025

- Led day-to-day operations across an indirect contractor workforce of approximately **100 people** and up to **four contractor companies**, managing a ~50-truck operation and **500+ monthly deliveries**.
- Reduced delivery non-conformances by approximately **30%** through structured problem solving, field controls and collaboration with internal stakeholders and contractors; implemented process standardisation for proof-of-delivery (POD), delivery points and an automated daily planning report.
- Managed end-to-end logistics across mine, plant, workshops, warehouses, camp and projects, covering receiving, storage, dispatch, transport, field delivery, reverse logistics, inter-warehouse transfers, route planning and shipment tracking; also coordinated oversize loads and dangerous goods.
- Managed an inventory universe of **100,000+ SKUs**, with approximately 10,000-20,000 materials moving on a recurring basis; covered material criticality, availability, stockouts, backorders, safety stock, excess and obsolete inventory.
- Planned and prioritised material requirements from maintenance work orders, maintenance plans, criticality and lead times; supported major maintenance, outages and shutdowns with **6-8 week** planning horizons.
- Used SAP MM/MM at an advanced operational level across materials, inventory and warehouse operations; monitored OTIF, WOPIFOT, service level, delivery compliance, OTD, lead time, inventory accuracy, fleet availability/utilisation and budget variances, reporting directly to Superintendent and Manager-level leaders.
- As an internally authorised Contract Operator, supported individual service contracts above **USD 1M**, including one approximately **USD 2.4M**; monitored SLAs, contractor performance, staffing, fleet and service validation, and contributed to scope of work, technical, administrative and commercial tender documentation, cost structures and HSEC requirements.
- Temporarily assumed full-shift supervisory responsibility during staffing contingencies, coordinating four contractor companies while maintaining operational continuity, performance and safety standards; no injury accidents were recorded within the operations under my management/supervision during my tenure.

BHP | Minera Escondida

BHP Graduate Program - Warehousing & Ports

Antofagasta, Chile | Mar 2021 - Feb 2022

- Rotated through receiving, warehousing, inventory, consolidation and logistics, building an end-to-end understanding of material flows and the interface between warehouse, transport and site operations.
- Performed physical-to-SAP inventory reconciliation, **inventory discrepancy analysis**, adjustments, root-cause investigation, location control and physical/cycle inventory activities to support inventory accuracy and traceability.
- Automated daily and weekly planning and performance reports using SAP, Excel, Power Query, Power Pivot, VBA, macros and SAP Scripts, reducing manual consolidation by approximately **22.5 hours per month**.
- Converted lengthy operating procedures into concise one-page guides and standardised work practices; the team/process improvement was associated with approximately **12% higher process efficiency**.
- Led the first phase of BHP Operating System (BOS) implementation at Coloso Warehouse and temporarily assumed supervisory duties from Nov 2021 before moving permanently into logistics.

EARLIER EXPERIENCE

S y R Ingeniería

Site Supervisor

Chile | May 2018 - May 2019

- Directly supervised approximately 15 workers and coordinated around four suppliers/subcontractors across simultaneous projects; planned activities and controlled progress, schedule, quality, materials receiving, stock and inventory.
- Managed projects averaging approximately **CLP 140M** per project using Excel and Microsoft Project; implemented materials-control procedures and root-cause analysis and completed **365 days without injury accidents**.

Transportes NISSI | Professional Internship - Logistics & Administration | Antofagasta, Chile | Jan 2018 - May 2018 - Supported receiving, control, dispatch and distribution; assisted customers and digitised documentation and databases using Excel.

S y R Ingeniería | Initial Internship - Administration & Management Support | Providencia, Chile | Jan 2017 - Mar 2017 - Supported contracts, payroll-related documentation, databases, internal stakeholders, project preparation and recruitment/selection.

EDUCATION

Diploma in Leadership and Organisational Behaviour

Pontificia Universidad Católica de Chile

Nov 2025 - Sep 2026 (expected completion) | In progress

Ingeniero Comercial | Licenciado en Ciencias de la Administración (Business & Management degree, Chile)

Universidad Católica del Norte

Degree awarded Dec 2018 | Graduated with Distinction

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Completed: CSCMP Supply Chain Foundations: The Essentials Professional Certificate (2026) | Google AI Professional Certificate - Google/Coursera (Jun 2026)

In progress: SAP Business Analyst Professional Certificate - SAP/Coursera | Supply Chain Management Specialization - Rutgers University/Coursera | Microsoft Excel Professional Certificate - Microsoft/Coursera

Additional training: Business Intelligence with MS Excel & Power BI Desktop | Intermediate-Advanced Excel

TECHNICAL SKILLS & SYSTEMS

SAP MM/MM: advanced operational user (~4.5 years): material master data, PR/PO, MIGO, goods receipts/issues, stock movements, reservations, physical & cycle inventory, inventory reconciliation, stock transfers, STO, warehouse management, maintenance work orders and SAP Scripts.

Microsoft Excel: advanced: Power Query, Power Pivot, VBA, macros, pivot tables, XLOOKUP, INDEX/MATCH, advanced formulas, dashboards, external connections and reporting automation.

Power BI: working knowledge (basic level): data preparation, visualisation, basic dashboards, report updates and operational analysis.

Other tools: Microsoft Project | Microsoft Visio | SharePoint | Microsoft Teams | AutoCAD (basic/support use).

OPERATIONAL EXCELLENCE, BHP TRAINING & RECOGNITION

Operational excellence: BHP Operating System (BOS), Lean, 5S, Kaizen, Standard Work, Visual Management, Voice of Customer, Field Leadership, RCA, 5 Whys, Ishikawa, PDCA and DMAIC.

Relevant BHP training: HSEC, risk control and critical controls; first aid; dangerous goods handling; supervisor responsibilities; contract administration; internal authorisation as Contract Operator.

Recognition: BHP | Coloso Warehouse - recognised for BOS and 5S implementation/application | 2022.

LANGUAGES & MOBILITY

Languages: Spanish - Native | English - B1 Intermediate (EF SET 47/100; Reading B2, Listening B1); functional technical reading and developing spoken fluency.

Mobility: Open to relocation to Australia, New Zealand and other locations; experienced with 4/3 and 7/7 rosters; available for domestic and international travel; valid Chilean Class B driver's licence and passport.
