PROFESSIONAL SUMMARY

Commercial Engineer with approximately five years of experience in Supply Chain, materials management, inventory and operational logistics in large-scale mining, primarily at BHP | Minera Escondida. Experience in maintenance and shutdown materials planning, SAP MM/MM, contractor and stakeholder management, KPIs, continuous improvement and operational safety. Track record across operations involving approximately 50 tractor-trailers, 500+ monthly deliveries and around 100 contractors, including approximately 30% fewer delivery non-conformities and 22.5 monthly hours of manual consolidation eliminated.

CORE COMPETENCIES

Supply Chain | Materials Management | Materials Planning | Inventory Management | Maintenance & Shutdown Materials | Work Order Planning | SAP MM/MM | End-to-End Logistics | Warehouse & Transportation Operations | Contractor & Stakeholder Management | HSEC & Operational Safety | Operational Excellence & Problem Solving

PROFESSIONAL EXPERIENCE

BHP | Minera Escondida

Supervisor Home Delivery (Operational Logistics)

Antofagasta, Chile | Mar 2022 - Oct 2025

Scope: Logistics operation involving approximately 50 tractor-trailers, around 100 contractor workers and up to four external companies, with 500+ monthly deliveries and reporting to Superintendent and Management levels.

- Managed end-to-end materials logistics to mine, plant, workshops, warehouses, camp and projects, coordinating receiving, storage, dispatch, transportation, field delivery, inter-warehouse transfers and reverse logistics.
- Planned material requirements from Work Orders, maintenance plans, criticality and lead time, including major maintenance, outages and shutdowns with approximate 6- to 8-week planning horizons.
- Managed and analyzed inventory across a universe of more than 100,000 SKUs, including stockouts, backorders, safety stock, criticality, excess and obsolescence to support operational continuity.
- Managed SAP MM/MM materials and inventory processes including Material Master, Goods Movements, Reservations, Inventory Management, Warehouse Management, Physical Inventory, Stock Transfers and Maintenance Work Orders.
- Reduced delivery-related non-conformities by approximately 30% through procedure review, operational controls, deviation follow-up and standardization of Proof of Delivery (POD) and delivery points.
- Performed Contract Operator duties and operational/contractual follow-up of services with individual values above USD 1 million, controlling SLAs, staffing, fleet, performance, service validation and deviation resolution.
- Applied HSEC standards, critical controls, risk assessments and inspections, providing visible field leadership and preventive risk management, with a record free of injury accidents in operations under my management/supervision.

BHP | Minera Escondida

BHP Graduate Program - Warehousing & Ports Management

Antofagasta, Chile | Mar 2021 - Feb 2022

- Rotated across receiving, storage, inventory, consolidation and logistics, developing an end-to-end view of material flows and experience in physical/SAP reconciliation, variance analysis and location control.
- Automated operational reporting by integrating SAP, Excel, Power Query, Power Pivot, VBA, macros, SAP Scripts and Power BI, reducing manual consolidation by approximately 22.5 hours per month.
- Participated in optimizing receiving, consolidation and inventory procedures and developed One Page operating guides, contributing to an approximately 12% improvement in process efficiency.
- Was responsible for the first phase of BHP Operating System (BOS) implementation at Coloso Warehouse, applying Standard Work, Visual Management, 5S, Kaizen and structured problem solving.
- Subsequently assumed temporary supervisory responsibilities due to operational needs and transitioned into a permanent logistics role after completing the Graduate Program.

S y R Ingeniería

Site Supervisor

Santiago, Chile | May 2018 - May 2019

- Supervised approximately 15 workers and coordinated around four suppliers and subcontractors across multiple simultaneous projects, with average project values close to CLP 140 million.
- Planned daily and weekly activities and controlled physical progress, schedules, quality and materials receiving using Microsoft Excel and Microsoft Project.
- Managed stock and inventory and designed procedures to strengthen materials control, reduce material losses and lower unproductive time caused by coordination gaps and rework.
- Maintained 365 days without injury accidents through field supervision, safety talks, risk assessments/AST, inspections and preventive risk control.

ADDITIONAL EXPERIENCE

Transportes NISSI

Professional Internship - Logistics & Administration

Antofagasta, Chile | Jan 2018 - May 2018

- Supported product receiving, control and dispatch, customer service and distribution administration; digitized documentation and developed Excel databases to improve organization and follow-up.
